### Email

mollenaezra@gmail.com

### Address

Bayawan City, Negros Or.,  
Philippines

## Education

2017

Marine Engineering  
Cristal -e College

2020

PostGrad Web Development  
Zuitt Coding Bootcamp

## Expertise

- Javascript / Typescript
- React / NextJs
- Node
- MongoDB/ Postgres/ DynamoDB
- Git

## Certificate/s

- [AWS \(SAA-C03\)](#)

## Experience

### July 2023 - Present

Lanex Philippines | Cebu City, Philippines

#### Web Developer

- Responsible for the end-to-end development of websites and applications. My duties include front-end development with React and Next.js, back-end architecture using Node.js and a bit of PHP (Laravel), user interaction design, server and database development, and mobile cross-platform optimization. I ensure application responsiveness and stay updated on the latest web trends and programming languages. I also helped develop a mobile app using FlutterFlow.

### December 2020 - June 2023

epico | MIDVIEW CITY, 22 SIN MING LANE, Singapore, Singapore

#### Web Developer

- Designed and developed the front-end components of the web comic platform using TypeScript and Next.js with Material UI, providing a smooth and engaging user experience for creators, readers, and scanlators.
- Implemented Cypress for testing, ensuring the reliability and scalability of the platform.
- Built the back-end components of the platform using Node.js, integrating various AWS services such as Lambda, S3, DynamoDB, and ElasticSearch for optimal performance and data management.
- Created a machine learning translation feature that automatically translates comics upon request with the help of Google Translate and OCR, improving accessibility for readers and scanlators.
- Collaborated closely with the product team and other developers to continuously improve and maintain the platform's functionality, scalability, and security.
- Contributed to the development of the platform's roadmap, ensuring alignment with business objectives and user needs.
